

Paragraph	Page
1. Purpose	1
2. Water Master	1
3. System Repairs	1
4. System alterations and/or additions.....	2

1. Purpose

1.1 The pressure irrigation systems require continued monitoring and maintenance. This policy establishes guidelines and procedures for this. Most systems are at or over their maximum capacity; therefore, this policy also establishes restrictions to additions/alterations to the systems.

2. Water Master

2.1 Horseshoe Irrigation Company will hire a Water Master each water year. The Water Master will be responsible for the distribution, monitoring, maintenance and/or overseeing of maintenance on the irrigation systems under the direction of the Company President.

2.2 The Water Master's annual salary will be determined each year by the Board of Directors.

2.3 The Water Master will be required to attend all regular board meetings during the water year.

3. System Repairs

3.1 All system maintenance and repairs will be made by or under the direction of the irrigation company.

3.1.1 If system repairs are due to normal wear and tear the cost will be covered from the company's expense accounts.

3.1.2 If repairs are needed due to water users' operations or animals, i.e. broken risers, repair costs will be billed to the water user in their annual assessment bill. The bill will be for costs of the repair(s) or \$50.00, whichever is greater. If not paid, individuals' water share(s) may be sold as outlined in policy 5 to cover these costs.

4. System alterations and/or additions

4.1 All pressurized systems are operating at or over the maximum designed capacity, except for the City and South Field systems; therefore, no additions will be allowed to those at max capacity. Any shareholder who wishes to alter or add onto either the City or South Fields systems must first get approval from the Board of Directors, **AND**

4.1.1 No addition or alteration may put a system over maximum capacity.

4.1.2 No addition may cause pressure problems on a system.

4.1.3 Any acreage addition must have been part of the original design of the system, or be done through an acreage (POU) transfer (ref. policy 1).

4.1.4 Any system addition or alteration, if approved, must be accomplished under the direction of the Water Master.

4.1.5 All costs associated with additions or alterations will be at the requesting shareholder's expense.

4.1.6 The Board of Directors may require any significant alterations to have engineering before consideration, which will also be at the requesting shareholder's expense.

4.1.7 Acreage additions must be part of the company's adjudicated acreage or by change applications made through company approval.

4.1.8 Any addition/hook-up that is approved to the pressurized irrigation system must;

4.1.8.1 Pay a back assessment for the system for which the addition is being made at the rate specific to the system and based on the exact amount of acres being added, example; if a city lot of 1.06 acres is added the back assessment would be $1.06 \times 608.53 = \$645.04$ back assessment due;

City lots	\$ 608.53 per acre
City acres	\$ 312.00 per acre
South Fields	\$ 167.05 per acre

4.1.8.2 Pay the annual assessment levied against the associated system going forward.

- 4.2 Hook-ups to any feed line delivering water to a pressurized irrigation system pond will be allowed for stock watering purposes only and under the follows conditions:
- 4.2.1 Requests must be submitted to the Board of Directors detailing how connection would be made.
 - 4.2.2 Requests must have Board of Director approval.
 - 4.2.3 The water must flow into a water trough with a float controlled valve or the return flow feeding back into the feed line.
 - 4.2.4 Stipulating the approximate number of animals to be watered.
 - 4.2.5 Class A water shares must be assigned to the system appropriate to the amount of water use.
 - 4.2.6 Any stock water hook-up, if approved, must be accomplished under the direction of the Water Master.
 - 4.2.7 All costs associated with connection including upkeep and maintenance will be the shareholder's responsibility.
